

## Our Stained Glass Window

Our window was designed by the children and then produced by a local artist. The children were involved with every step of the process that ended with creating the coloured effect of the window.

What images can you see within our window?

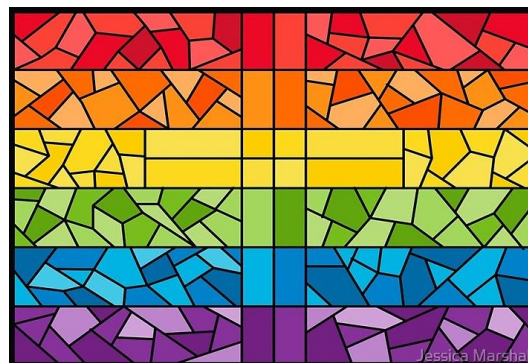

What do they mean?

Can you find similar images anywhere else in the school?

In most of their original designs, the children were all keen to include a rainbow which is a common theme throughout our school. From the entrance to each class, a rainbow can be found. Our daily prayers also include the colours of the rainbow.
