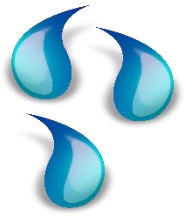
Visit from Anglian Water



We were delighted have a visit from Richard Parks and Jody Hollingsworth from Anglian Water this term.

During the assembly, pupils learnt about how much water various household appliances use and the need to conserve water where we can.

In addition to the The Eco-Committee completed a Water Audit to find out if there were any appliances leaking.

The Eco-Committee have designed sign to put up in all the toilets asking that people do not block toilets with paper!

The Eco-Committee will be doing a short assembly next term to outline what they have achieved so far and to talk to parents and pupils about the importance of conserving water.
